A Triumphant Return!

Bill & Ted's Bogus Journey (PG)

▲ These truly musical dudes, Bill & Ted, are back in the video shops this week because you can now rent their hilarious, adventurous all-B

Ted's Bogus Journey from 22.99 video.

It starts off in the world of the future with the frequently evil Doc Dy Nardoin sending two machine copies of Bill and Ted back in time to kill our heroes. No sooner said you say "Excellent!" than the pair from San Dimas are off to Heaven, hell and beyond as they try to correct their apparently dead personal!

Along the way they get mixed up in the Battle Of The Bands, play Twister with The Grim Reaper and have to face the evil of Bill's old Garry Poshin and Ted's Easter Bunny! (Good)

As you might have read in *What's New*, *Bill And Ted's Bogus Journey* is out on video this week. Which means it's now possible to visit Heaven, Hell and beyond in the comfort of your own home!

Truly Bogus!

There are some amazing Heaven and Hell sequences in the movie. In Heaven everything's shiny white and it's where they come across lots of strange, wacky and weird characters; Hell is like something out of a nightmare where they meet up with the Devil and play games with him like Twister. The sequences in Heaven and Hell were put together by the company who also did the special effects for the 18-rated films *Die Hard 2* and *Terminator 2*.

Bill And Ted writer Ed Solomon reckons the guys are popular because they're so positive. "They're really 'up' and positive about everything," he says. "The original idea was that when they were in high school they went around saying 'hello' to everyone, and no-one liked them. But they didn't care."

Take a look at Keanu Reeves's chest in the film and you'll probably notice a scar. "It's huge!" he says. "I got it when I crashed a motorbike into a mountain years ago." Keanu likes speed: his ambition was to become a racing driver before he took up acting.

Alex Winter is a bit of a hit on America's MTV satellite station. He writes, produces, directs and stars in a successful comedy show called *The Idiot Box*. In his first ever film *Squeak Of Death*, in 1983, he played no less than 10 different characters.

After making their two *Bill And Ted* movies, Keanu and Alex are the best of mates. "We became good friends early on in the auditions," says Alex, "and now we conduct most of our conversations in Bill And Ted-speak."
